Food Processing Machinery

## Soft Separators

### 600 series

#### Technical Data:

- drum hole diameter:  
1.3; 2; 3; 5; 8 mm  
other diameters upon request
- Throughput rate: \*  
Complete range of machines  
available according to desired  
throughput
- Operator: 1 person

#### Customer Benefits:

- superior product quality
- product free from peel, seeds, stems and the like
- highest yield
- economical and profitable process
- Complete range of machines available according to desired throughput

#### Options:

Different raw product can be gently processed, e.g.

- Pineapples, apples, onions, etc.

#### Machine Applications and Features:

A flexible squeezing belt transports the product to a perforated drum and gently squeezes the softer particles through the perforation. The harder particles such as peel remain outside of the drum. The raw product and the hole diameter of the drum determine the texture of the final product.

**„BAADERING“**

=

**Profit**

exemplary

\* The throughput values vary extremely in dependence of the hole size in the perforated drum, the type of feeding, the product and its pre-treatment (e. g. degree of pre-grinding), the feeding temperature, the selected pressure etc. The values for each application have to be determined individually between the purchaser of the machine and the supplier.

Illustrations and dimensions are approximate and not binding. Subject to design changes in the interest of technical progress. Actual scope of supply is specified in our quotations and order confirmations and may differ from descriptions and photos of this leaflet.

#### Attention!

For the illustration of technical details the safety devices and protection mechanisms are partly not shown in operative condition. When operating the machine, all corresponding devices and instructions referring to the safety of the machine are to be utilized and/or observed!
